**In the United States Patent and Trademark Office**Serial Number: 10/805,936Application filed: 3/22/2004Applicant: David E. HuddlestonTitle: Repositionable adhesive mounted fabric assembly and decoration processInvention assignee: IMHUDCO, LLC (PTO/SB/96 enclosed)Examiner/GAU: Nathan E. Durham**Response to first office action**

Sir,

Enclosed are revisions of the above patent application, in response to the Patent Office's first office action. Also enclosed is form PTO/SB/96, attesting to the assignment of said application to IMHUDCO, LLC. Hereinafter, IMHUDCO, LLC will be referred to as the assignee.

Here follows the assignee's point-by-point response to the office action:

Drawings

The mistaken use of the same reference character for two drawing features has been corrected. The character '11' was retained to refer to the registration holes in various drawings. The character '201' was employed to refer to the threads in drawings labeled Fig. 1 and Fig. 2F. The corrected drawings are enclosed. The text describing these two drawings has also been corrected to reflect the change in reference character for the threads. The first correction is on page 8, line 8. The second reference character correction is on page 9, third from the last line.

Specification

The abstract, which appears on page 22, has been amended per the examiner's instructions.

In the discrepancies found by the examiner with respect to references to disclosure documents, the patent numbers given in the Disclosure Statements are correct. The discrepancies were due to typographical errors in the specification. The faulty reference to 1,171,155 on page 4, line 5 has been changed to 1,171,154. The faulty reference to 6,651,642B2 on page 4, last line has been changed to 6,561,642B2.
